

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

WITHIN THE ATOM

By JOHN MILLS

(Author of "Realities of Modern Science")

A fascinating non-technical exposition of the structure of the atom and the electron theory.

Describes with entire freedom from mathematics the recent discoveries of Langmuir, Bohr, Millikan, Einstein, and others of our foremost modern scientists.

The charm of its lucid style will appeal to the reader untrained in science.

Third Edition—Now Ready

AMERICAN MEN OF SCIENCE

A BIOGRAPHICAL DIRECTORY

Edited by J. McKeen Cattell and Dean R. Brimhall

The third edition of the Directory contains about 9,600 sketches as compared with 4,000 in the first edition and 5,500 in the second edition. The work should be in the hands of all those who are directly or indirectly interested in scientific work.

(1) Men of science will find it indispensable. It gives not only the names, addresses, scientific records and the like of their fellow workers, but also an invaluable summary of the research work of the country, completed and in progress.

(2) Those interested in science, even though they may not be professionally engaged in research work, will find much of interest and value to them in the book.

(3) Executives in institutions of learning and others brought into relations with scientific men will use the book constantly.

(4) Editors of newspapers and periodicals will find it to be one of the works of reference that they will need most frequently.

(5) Libraries will find the book to be a necessary addition to their reference shelves.
